

Access critical operational intelligence and know your threat exposure on a single dashboard across all your devices.

WORLDCUE COMPANION ENABLES YOU TO MONITOR AND QUICKLY COMMUNICATE WITH PEOPLE WHO MAY BE IMPACTED BY AN EVENT.

Prepare, Monitor, Respond

At-a-glance Alert Feed and Impact Count: quickly identify the potential impact of threats to your organization, including information about who may be at risk.

Worldcue[®] Communicator^{*}: In the event of a threatening incident, you can immediately send out a message to your people in the affected area via SMS, email and in-app push notification with Worldcue[®] Mobile. Recipients can then confirm their safety or need for assistance using any of those channels to reply. An intuitive dashboard provides real-time insight into messages sent and responses received.

Integrated Crisis Signal and Safety Check-in*: with the Worldcue Mobile app integrated into your program, personnel can activate a panic button or just confirm their status through a general check-in button. The status of personnel can be viewed on your Companion dashboard, from any device.

High-Risk and VIP Travel Metrics: know which of your VIP's are travelling, and which of your employees might be in or going to high-risk destinations. You have the ability to drill down and obtain immediate visibility into potential threats.

My Locations Filter: quickly filter the Alert Feed to show only the alerts for your selected locations.

Dynamic Intelligence, on the go: access the intelligence you want; view location-specific alerts, destination intelligence and security ratings for countries and cities around the world.

Identify Potential Exposure by Destination: Worldcue Companion can help you make better-informed decisions by allowing you to quickly view a list of people by location (country or city) alongside active alerts and destination intelligence.

Full Itinerary and Assignment Details: quickly assess a threat's impact on your people's air, hotel, rail or car plans, including those on expat assignment.

Easy Access to Contact Information: get up-to-date contact information for any person in the event of an emergency.

Access to your organization's Hotline Phone Number*: one-tap connects you with iJET's Global Integrated Operations Center team to quickly triage calls from your people around the globe and help ensure they get the assistance they need for any travel, security or medical issues.

AXA Assistance Medical Provider Search:** expedite the search for the closest and most appropriate AXA Assistance medical providers during an emergency situation
