

About iJET®

Operate Globally with Confidence

Our mission is to increase our clients' confidence and readiness to operate globally and securely. We do this by providing tailored integrated risk management solutions that results in reduced risk and increased profitability.

CORE CAPABILITIES

iJET provides world-class intelligence analysts, patented Worldcue® technology solutions and global response services to equip decision-makers and organizations with real-time information to prepare, monitor and respond to potential business risks while maintain a competitive edge. Our risk management programs provide a platform for operational success.

Intelligence

Timely, predictive, actionable intelligence, coupled with custom assessments and analysis.

In today's world, information alone is not enough. Our global intelligence platform monitors the world 24x7 for threats to clients and their operational assets. With multisource data, standardized processes, analytics and subject matter experts, we help reduce risks delivering:

- **Alerts** specific to threats and events around the world, published 24x7 according to client protocols
- **Assessments** that help tailor analysis and reporting to support strategic business decisions
- **Client Bulletins** that report on developing events with broad and significant impact
- **Destination Intelligence** from around the world
- **Intelligence Subscriptions** delivered daily, weekly and monthly to report on global security and health developments

iJET Global Integrated Operations Center

Technology

Automated and unified view of people and assets with targeted communications to affected parties.

The success of any integrated risk management program is ultimately measured by the safety, security and productivity of an organization. iJET's award-winning Worldcue technology solutions automatically alert hundreds of multinational organizations, millions of travelers and expatriates about disruptive events – before they happen.

- **Automated Notifications** emailed to travelers with pertinent information to lower risk
- **Online Intelligence, Mapping and Dashboards** provide a global perspective
- **Reports** provide up-to-date intelligence, traveler details and asset status
- **Secure Operations Centers** staged in local areas for event-based support or communications

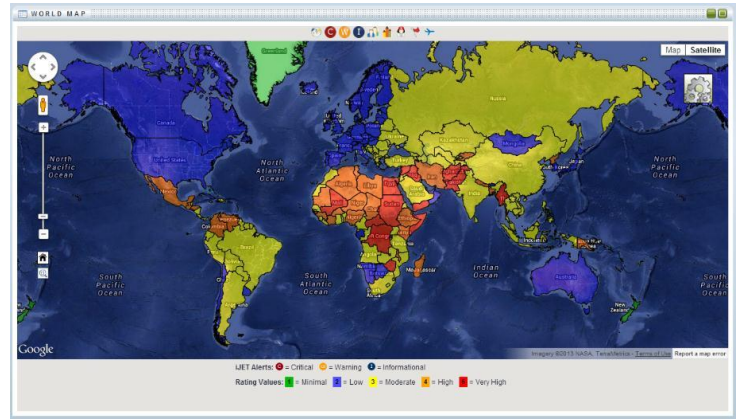

Operations

Integrated and customized global emergency response services for travelers and all employees.

iJET's global response services deliver world-class on-the-ground assistance, helping you prepare, monitor and respond to potential or imminent threats. Our proactive approach – *Prepare, Monitor and Respond* – begins with conducting assessments, determining operational

protocols and communication procedures in effort to mitigate risks and keep people safe.

- **Global Hotline** provides one place to call 24x7 from anywhere in the world
- **Travel, Medical and Security Assistance** is available for routine and urgent needs
- **Proactive Monitoring of Critical Alerts** inform travelers with vital communications
- **Wellness Check-In Programs** support protocols to confirm employees are on-time and safe
- **Drills and Exercises** ensure policies, protocol and people are ready for the broad-scale and live events
