

# iJET Worldcue® Mobile

Operate Globally with Confidence

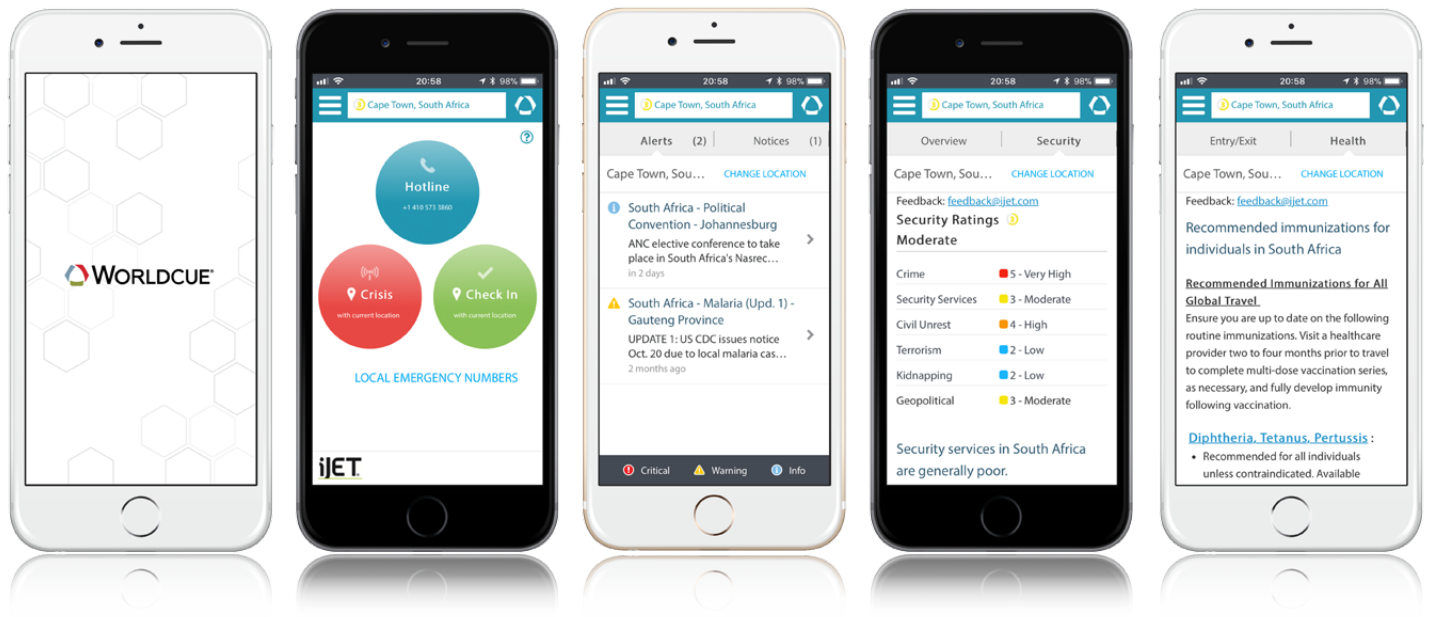

iJET's Worldcue® Mobile app is designed to deliver critical information and support to your people – when and where they need it most – giving them access to vital live intelligence and a contact point for emergencies.

## PROVIDING INTELLIGENCE AND ASSISTANCE TO YOUR PEOPLE TO AVOID AND MITIGATE RISKS AND ADVANCE YOUR RISK MANAGEMENT PROGRAM.

- Immediate access to critical information, tools and assistance
- Quick connection to global hotline services
- Geolocation in relation to threat incidents
- Streamlined ability to confirm the safety of your people

Get it on [Google Play](#) and [Apple iStore](#).

### ADVANCE YOUR RISK MANAGEMENT PROGRAM

Worldcue® Mobile is designed to extend your Risk Management program. You can customize the app's features by mapping to your organization's preferences and standards. If you do not have standard operational procedures in place, iJET will help you to build a solution for excellence and efficiency. Our solutions will help your organization Prepare, Monitor and Respond to threats, mitigate risk and save money while fulfilling your responsibility to ensure the safety of your people.

## KEEP YOUR PEOPLE INFORMED AND SAFE

The best way to keep your people safe is to keep them informed of developing safety and security issues, and the tools to reach out in an emergency, no matter where in the world they are located.

**Alerts on threats and events\*:** Your people are kept informed and aware of incidents that could disrupt meetings, business operations or travel, worldwide and 24/7.

**Embedded alert maps:** Users can see their location in relation to the area where an incident is occurring, helping them reduce risk and avoid disruption.

**Worldcue® Communicator:** When utilizing Worldcue Companion® you can send your people a message in response to an alert asking them to confirm their safety. App users can receive and reply to the messages using an in-app push notification.

**In an emergency:** For immediate help anywhere in the world at any time, Worldcue® Mobile connects a distressed person to a designated emergency contact for assistance with a single tap of the Crisis signal button – while pinpointing their current location. The Hotline and Check-in buttons can also be configured to give you and app users extra channels of communication and support. The Quick Connect buttons can be directed to iJET or your own operations center and can also be customized to best suit your organization or program.

**Important Notices:** Created by your company, reminding your people of policies and procedures that should be followed.

**Destination Intelligence\*:** Our analysis for hundreds of cities and countries around the world is available on the app, including: Security; Weather; Health; Exit and Entry; Transportation; Legal; Culture; Language; Financial; Communications/ Tech and Environmental categories.

**Navigation Languages:** These include English US/UK, French, German, Italian, Japanese, Mandarin, Norwegian, Portuguese, and Spanish

**All People Access\*\*:** Provides the option to expand risk management support to create a “lifeline” for all your people – including those that are travelling and those based at the head office or locations around the world.

\*Intelligence content available in English and Japanese.

\*\*This feature availability depends upon your iJET service subscriptions.

*Worldcue® Mobile is available on all Android 6.0+ and iOS 10.0+ operating platforms*

Our mission is to be the industry leader, providing tailored solutions to help our clients operate globally with confidence. Each day, our insights protect the personnel, assets, and investments of those we serve.
