

Worldcue® Critical Monitor – worldwide, proactive threat monitoring tailored to meet your organization’s needs

PROACTIVE SECURITY MONITORING THAT’S UNIQUE TO YOU

Headquartered in Annapolis, Maryland, iJET has partnered with over 500 multinational corporations and government organizations to monitor threats specific to 130,000 facilities, suppliers and assets globally.

iJET’s Response Operations Center (ROC) is more than a hotline, or “Duty of Care” check box. The ROC is a trusted advisor for security planning, response and assistance services. iJET’s International Global Operations Center is a world-class team equipped with a set of tools that enable clients to prepare for, monitor and quickly respond to a variety of potential or realized threats in the most effective way possible.

Every organization in the world has a different approach to protecting people and assets. With **Critical Monitor**, iJET acts as your eyes and ears to proactively identify threats and communicate the impact quickly. Our Response Operations Center monitors potential and active threats worldwide 24 hours per day, 7 days per week, 365 days per year to help you protect your most important resources.

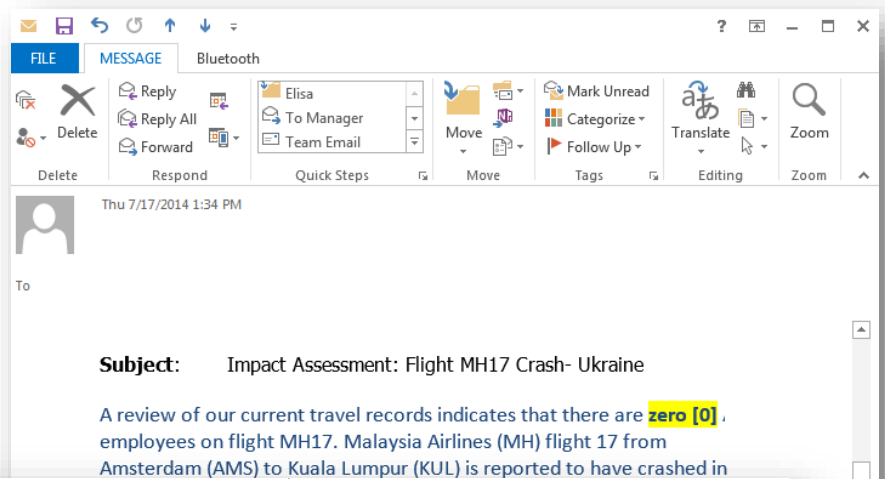

Critical Monitor

When a critical threat or event impacts your people or assets, you not only need to know what’s happening, you also need the best advice on what to do next.

iJET’s Response Operations Center monitors worldwide threats and provides advice based on your specific global footprint. Unlike other one-size-fits-all programs, iJET tailors Critical Monitor to meet your unique combination of country locations, employees, facilities and security installations.

Critical Monitor Services, include:

- 24/7/365 global, Critical Alert monitoring
- Analysis of the threat and potential impact
- Immediate communication to points of contact in your organization
- Detailed list of people potentially impacted in a Client Impact Assessment
- Review of mitigation options and provision response (optional)
